

# Workspaces of the Future

*with* Interactiv Solutions

## Interactiv Solutions

Our world is changing at a rapid pace and so is the technology that shares information quickly and creatively using the latest innovation. At 'Interactiv Solutions' we take your ideas and present the latest technology to help make your project a reality - continuously assessing global trends and working with local and international partners to represent emerging innovation - ensuring that our clients have what they need to stay at the top.

Our *'Workspace of the Future'* guide shares our portfolio that enables business to thrive during these extraordinary times; **visit, work, meet and communication** has now got simple and safe with Interactiv Solutions.

# Visit

## A professional and efficient way of hospitality

Our digital visitor registration systems provide self-registration for your visitors. It relieves the receptionist of unnecessary time-consuming tasks so he/she can operate more like a host. It is also an ideal solution for unmanned receptions.

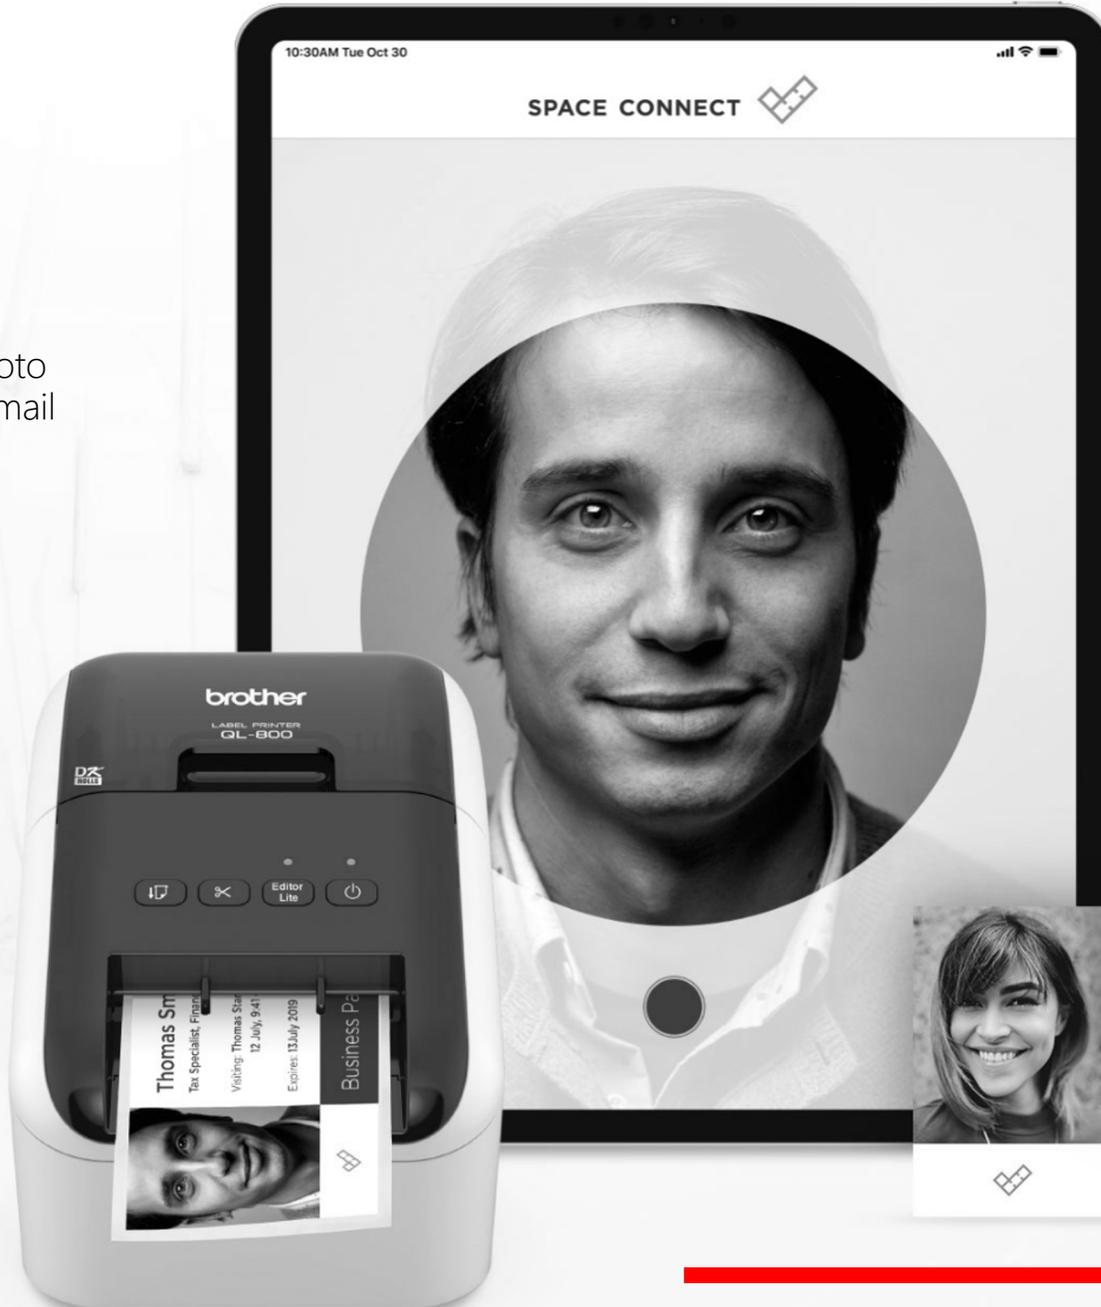

After registration the required contact person automatically receives a text message and e-mail to be able to pick up the visitor quickly.

Our digital visitor registration systems comply with the GDPR legislation of the EU, as opposed to paper registration lists at the counter.

## Photo capture and badge printing

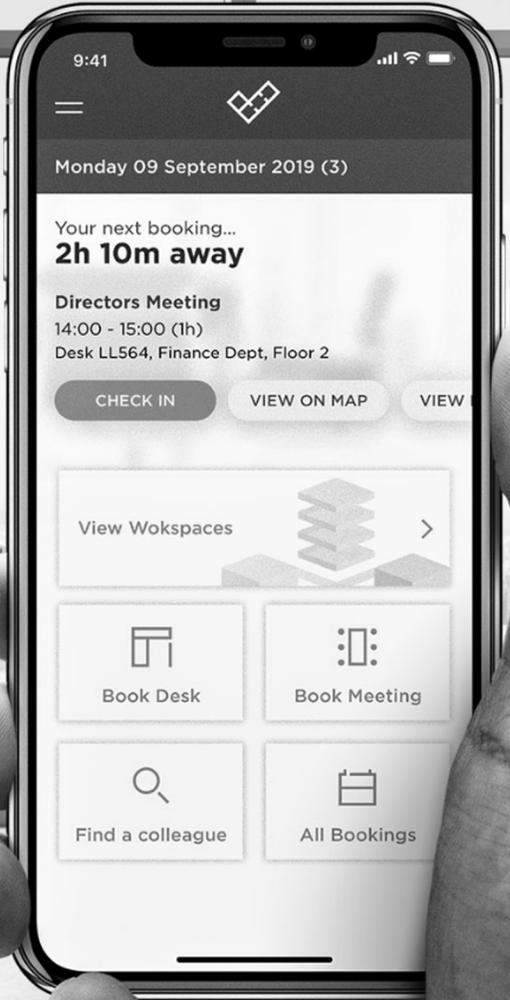

Our ID features let you capture a photo of visitors and send it via SMS and email alerts to the host – plus you get inclusive visitor badge printing complete with photo, for added security.

## Workspace Management

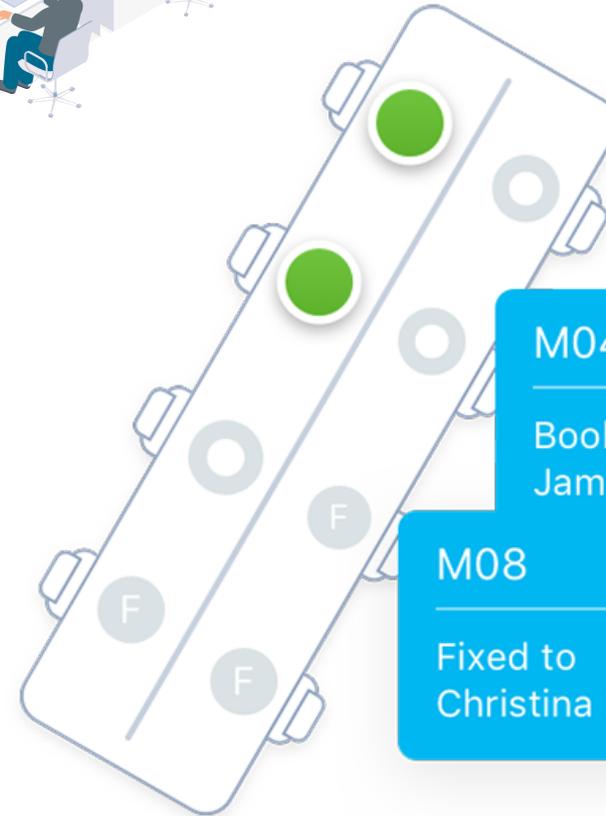

## Desk Booking Software and user Apps

How can I improve workspace booking experiences and improve productivity?

Interactiv Solutions Desk booking software give you the tools and data to implement and manage desk sharing and activity-based working schemes; helping you create a better workplace experience for an agile workforce. Our user-friendly applications makes it easy for staff to find and reserve a workspace that meets their needs, find people in the building and manage workspace bookings.

Interactive charts enable you to analyse yearly, monthly, weekly, daily and even 15 minute interval trends on individual space, floor or entire building occupancy.

## Room Booking Units

### How do I improve the management of meeting room bookings?

Management of meeting rooms should be easy and effortless, freeing up administration and front-of-house teams to provide a great experience for employees and visitors alike.

With Interactiv Solutions Room Booking software and hardware it's easy to book or request meeting rooms, either as part of a meeting in Outlook, on the web, on a mobile app, or on touch screens outside your meeting rooms. You can also order services, add visitors, and schedule video conferences. Everything feeds into one simple workflow that minimizes complex administration tasks, creating a better experience for everyone.

Communicate

zoom

## *Wireless Conferencing*

### **How do we improve the meeting experience and integrate with Microsoft Teams or Zoom efficiently?**

Our range of wireless conferencing platforms leverages the laptops users bring into the room, along with their video conferencing services of choice to create a **touchless** meeting room experience.

Share the room display camera and audio through any popular conferencing platform so remote users can see and hear everything in the room – remember this can also be delivered remotely from your phone or laptop.

## *Conferencing Cameras and Microphones*

### **How do we improve the meeting experience ensuring best quality audio and vision?**

We are now collaborating more over video but getting the audio right should be your priority.

Interactiv Solutions continually look at the market assessing the best audio and visual products to give the best performance for your meeting.

Our Nureva HDL range of microphones using Mist technology means people can be heard anywhere in the room making it easy to stay distanced without compromising on sound quality.

Carefully selected cameras with HD ultra wide angle lenses ensure that everyone is clearly seen when there close to the camera.

## Interactive Displays

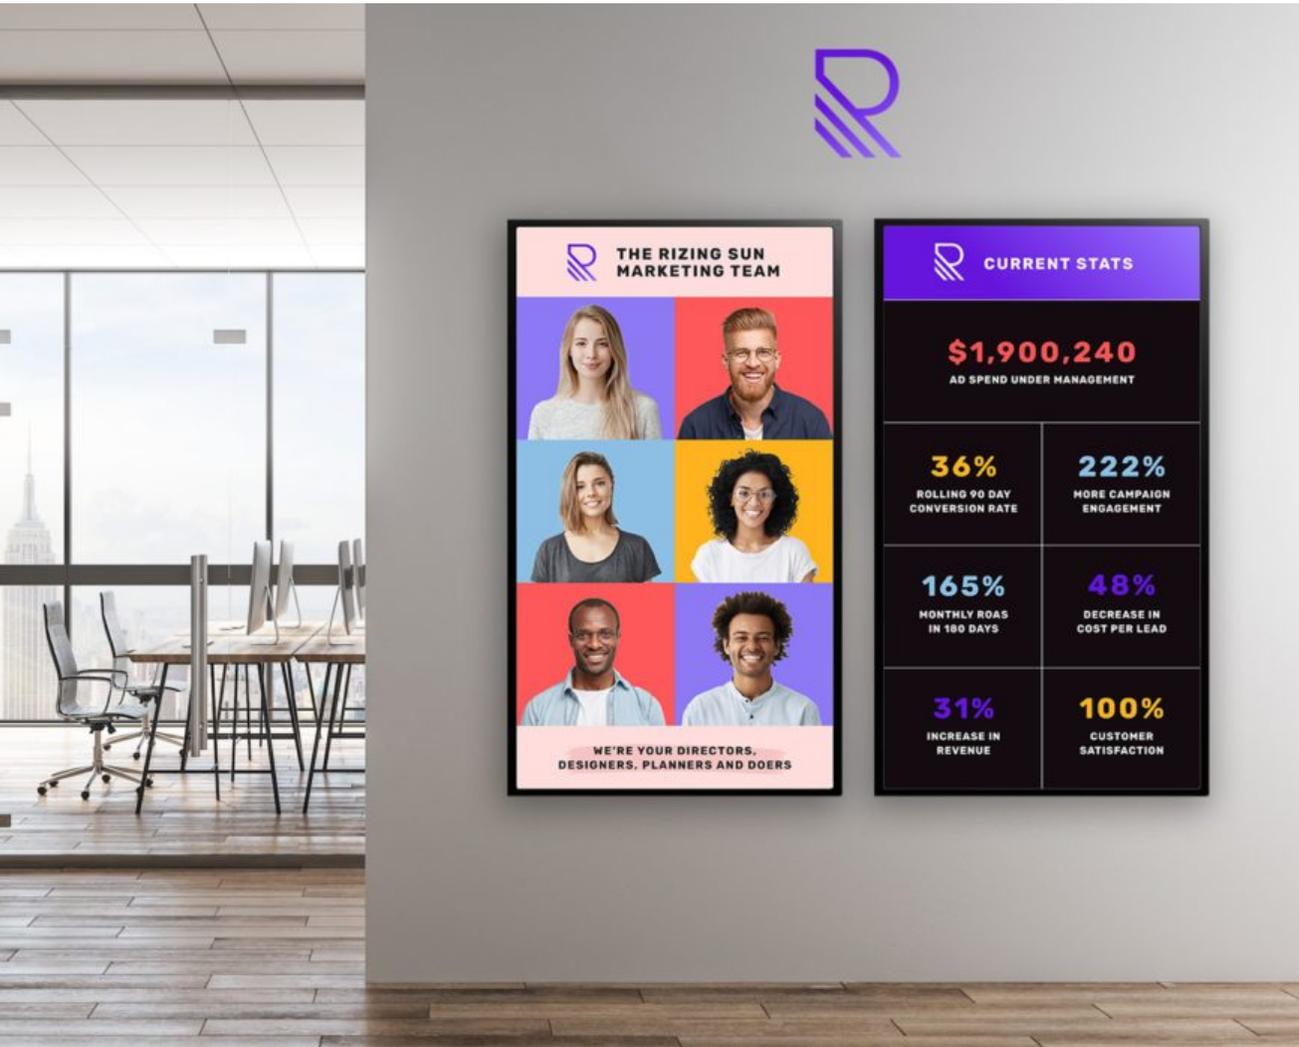

Unlock True Collaboration with our Touch enabled screens. Interactiv Solutions and Smart are pushing the limits of digital collaboration to enable true interactive contribution – from anywhere. Paired with the latest UC microphone and camera hardware from Poly, Microsoft Teams and Zoom can be easily integrated into your meeting spaces.

Today's workflows are about going beyond communicating to collaborating. Whether your technology needs are for boardroom presentations, remote collaboration or brain storming – our SMART interactive displays have you covered.

Pick up a pen you already know how to use it.

**Speak with our team for more information on any of our Visit, Meet and Work solutions.**

## Digital Signage

Digital signage can accomplish in a fraction of a second something that traditional signage sometimes fails to deliver: catch the attention of busy employees passing the sign and communicate business critical messaging.

Increasingly, companies are also introducing corporate digital signage to influence staff behaviour, inform both staff and visitors as well as establish a strong corporate culture and brand identity. Not only helpful for employees, but a funky and engaging way to communicate with anyone emersed in your brand from entertainment venues, offices, schools to retail space.

**Let our digital signage tell the story.**

## Hardware as a Service

Turn your enterprise's Audio Visual infrastructure costs from a capital investment into a ***manageable fixed monthly operating expense*** with Hardware as a Service.

### What is Hardware as a Service?

Can your enterprise afford to replace the essential hardware that it needs to run properly? Interactiv Solutions are proud to offer Hardware as a Service (HaaS). Our HaaS is a solution for companies that don't want to be saddled with, or simply cannot afford to take on, the capital investment of updating their Audio visual and meeting space hardware.

### Save Money on Essential Hardware

Microsoft Teams Zoom and other collaboration solutions are now commonplace in how we communicate within the workplace. Getting the correct hardware in the room can be essential to getting the most from your meetings.

### Gain Peace of Mind

Your AV and Meeting rooms will always be current because we refresh your hardware before it becomes obsolete to keep your business efficient and profitable.

This means your hardware remains current with just the monthly cost of your managed services agreement. Contact us for quote at [enquiries@interactivsolutions.co.uk](mailto:enquiries@interactivsolutions.co.uk)
